

# Transitioning to the new radio system

---

EMS Officers & members

May 2023

# On the effective date

Sometime in early 2023

- 
- All communications currently taking place on talkgroup “EMS Response x” in the UHF-E A1 zone, will be transitioned to the new county radio system. Several changes to naming and use will commence at this time. At the designated time, users should push the “Home” button on their mobile and portable radios to take them to channel 1 in the “EMS Primary” zone. Then utilize the channel selector to move to your “MC EMS x” talkgroup. This will be your everyday channel going forward. Referred to as “Morris EMS x”.
  - i.e. EMS Response 3 today will become MC EMS 3 on the new system.

# Home button

Takes you to EMS Primary zone, channel 1

# Set your Primary, everyday channel

---

Press and **hold** to **set** for your primary zone/channel if different from HOME.

Press once to go to this channel from any other zone/channel

# Changes to procedure

---

- Mutual Aid events requiring long distance communications for command: (formerly OPS1-9)
  - If you are the “host agency”, remain on your “MC EMS” channel and outside responding units will be directed to that talkgroup. This channel is NOT for on-scene operations, but for response, command and control with mutual aid units and county dispatch.
  - If you are a responding agency responding to another jurisdiction, you will be directed by county dispatch to the appropriate “MC EMS” or TAC talkgroup. This channel is NOT for on-scene operations, but for response, command and control with the host IC, other mutual aid units and county dispatch.
  - If your primary assigned “MC EMS” talkgroup is already in use by another entity with a major event, you will be directed by dispatch to an alternate “MC EMS” or TAC talkgroup for another/concurrent incident.

# Changes page 2

---

- Incidents at Morristown Airport, or in the Route 287/24 corridor: (formerly OPS2) utilize the “HWY/AIRPT” talkgroup in the “TAC” zone, channel 8 (one up from EMS Primary). Set a MS button to quick, easy access.
- Interoperability with FD units or planned events requiring long distance communications: (formerly OPS1-9) contact dispatch for assignment of a “PS TAC” channel in the “TAC” zone, channels 1-7 (one up from EMS Primary).

# Changes page 3

- Interoperability with Police units: (formerly OPS10-25) contact county dispatch for assignment of a “PS TAC” in the “TAC” zone, channels 1-7 (one up from EMS Primary).
- EMS units NOT dispatched by Morris County who are responding to an incident outside of their town, or who need mutual aid to their town: (formerly EMS MA) contact dispatch on “MIRS” (Channel 16 in the “TAC” zone) for assignment of a “MC EMS” channel for the incident in the “EMS Primary” zone, or a “TAC” channel in the “TAC” zone.
- Unknown assignments or to contact other dispatch centers (within Morris County) should be done via the “MIRS” talkgroup.

# Changing zones

<b>Use Zone UP</b>	<b>Use Zone menu</b>	<b>Use Zone Down</b>
Increase 1 at a time	Select menu to scroll through all zones	Decrease 1 at a time

For ease of operation, the MS1-MS5 buttons (use U/D/L/R button to move once screen to the right) on the mobile menu (MS1-MS3 on portables) can be preset by the user for frequently used channels in any zone.

Push &  
hold to set

# Mobile radio buttons

# Dynamic Zone

---

- You can also program any channel from any zone into the Dynamic Zone so that you can always remain in that zone with your most frequently used/needed channels.
- You can have as many channels as you want in this zone in mobile units, but only 16 on portables
- Move to the Dynamic zone and use the ZNPR button to add/delete channels
- A demonstration video is available on the website.

# Additional information & training

---

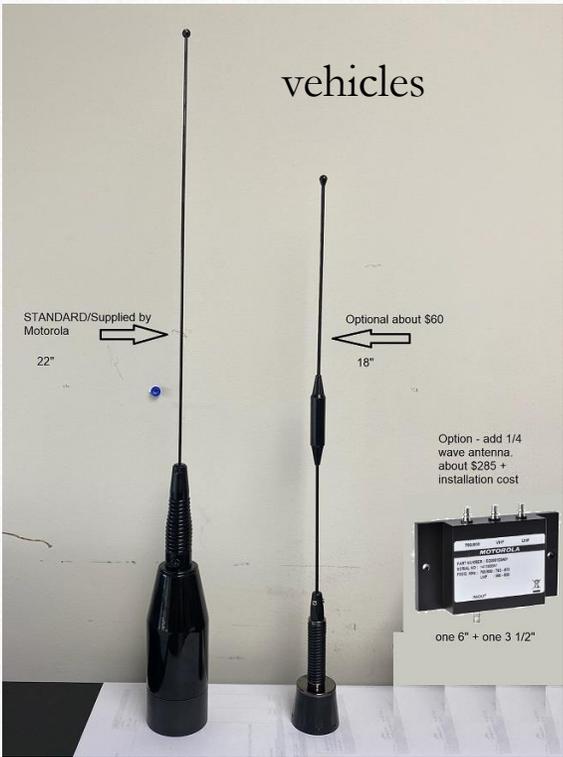

- For additional operation and instruction for the radio system, radio operation, scan lists, dynamic zone programming, see videos and documents at <https://www.morriscountynj.gov/Departments/Communication-Center/Training-Guides>

# Antennas

- Good

portables

vehicles

- Bad - Not approved by Motorola (may void warranty and/or damage radio)

portables

vehicles

## FYI (for further discussion)

---

- **Mutual Aid out of County** – contact Comm Center for assignment of a UTAC or UASI channel
- **Comm Center patching channels** – can be done for disparate systems, but in most cases, users should have necessary channels in their radios
- **Dynamic Regrouping** – radios can be forced to another talkgroup if they are unable to find it
